

HADI BUDHY

SENIOR DATA ANALYST - GROWTH & DECISION ANALYTICS

Jakarta, Indonesia | hadi.budhy@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Data analyst with 5+ years across business intelligence, customer analytics, and data automation. Turns messy business data into decision-ready analysis, reliable reporting, and practical tests. Public work demonstrates experimental design, causal restraint, marketplace measurement, and auditable AI workflows.

EXPERIENCE

Data Analyst | Consumer commerce platform

Oct 2024 - present

- Own event-driven alerting and warehouse pipelines for customer-activity monitoring.
- Maintain live dashboards used by support and product teams to detect and respond to change.

Data & Automation Consultant | Independent consulting

Mar 2023 - Oct 2024

- Turn complex survey and campaign data into reusable analytical models.
- Automate warehouse workflows and translate results into leadership-ready reporting.

Senior Business Intelligence Analyst | E-commerce platform

Jul 2022 - Mar 2023

- Connected churn, segmentation, and cohort analysis into a consistent customer view.
- Governed KPI definitions used by retention and marketing teams.

Business Intelligence Analyst | E-commerce platform

Apr 2021 - Jun 2022

- Built product, customer, and commercial reporting for recurring decision support.
- Surfaced engagement patterns used in roadmap discussions.

SELECTED PUBLIC EVIDENCE

Campaign Incrementality - Randomized benchmark analysis separates additional conversions from customers who would have converted anyway. [Case study](#)

Marketplace Supply & Demand - Limited-data diagnosis separates recorded trips from the requests and driver hours required to measure imbalance. [Case study](#)

MTA Comparator Audit - Descriptive audit shows why an unstable comparison should not support a congestion-pricing claim. [Case study](#)

ComplaintFlow - Reference implementation combines transparent routing, approved-playbook retrieval, uncertainty escalation, PII redaction, and an auditable decision log. [Case study](#)

SKILLS & EDUCATION

Decision scope: experiment design, KPI governance, customer cohorts, warehouse pipelines, event-driven alerting, live dashboards, marketplace measurement, and auditable AI workflows.

Selected portfolio signal: independent public analyses show a 0.115 percentage-point benchmark conversion lift, 61.3% of retail revenue from the top customer decile, and 73,211 restaurant inspection records rolled up for uncertainty-aware prioritization. The MTA audit demonstrates when not to claim a policy effect.
